

To our valued patients:

The health and well-being of our patients is our top priority. With the escalation of COVID-19 coronavirus cases, our optometry office is taking extra precautions including deep cleaning of all surfaces, equipment, and products.

We are asking all patients that are experiencing illness, fever, dry cough and/or shortness of breath or patients who have traveled by air within two weeks of their scheduled appointment to please reschedule. No cancellation fees will be charged for canceled appointments.

If you are a contact lens wearer and have less than a 60 day supply of contact lenses, we encourage you to get in touch with our office and obtain more lenses. This will ensure uninterrupted contact lens wear in the event of a breakdown in our supply channels or our ability to deliver contact lenses to you.

We are actively monitoring both local and national information about the Coronavirus and are continuing to do everything we can to keep our practice a clean and safe environment for you and your family. Our office & doctors will continue to closely monitor COVID-19 and will follow the guidelines provided by local and national organizations like the CDC and WHO, and can assure you that our practice remains a safe place to continue your uninterrupted eye health care. Unless circumstances change we will continue to be open, taking appointments and servicing our patients during this time.

We felt it important to keep you updated, and If you have any questions or concerns, please feel free to give us a call.

Thank you for being such a valued patient,
The Zargar Eye Care Team
